

❖ **TG-ECOCHM101** is customized product of “The Global Ecosaver”- Bangalore. This product is non-hazardous, non-toxic, non-allergic and non-corrosive Bio-Granules, used in Wastewater treatment to enhance Bacterial growth & overall treatment efficiency.

❖ **TG-ECOCHM101** is a source of Nutrients (phosphorus and potassium), it is also a buffering agent. When used in fertilizer mixtures with urea and ammonium phosphates, it minimizes escape of ammonia, enhance organic digestion and optimize overall waste water treatment quality.

Organic Waste + TGECOCHM101 + O₂ = New Cells + CO₂+H₂O+Energy

Features:

- Enhanced BOD & COD removal in High & Low Temperature
- Rapid builds up of MLSS level
- Rapid start-up following initializing and reseeded
- Energy, CO₂ & Cost reduction
- Reduction in Filamentation, Bulking & Foaming
- Reduction in sludge volume
- Reduce /oxidize organic & inorganic components
- Help in achieving quality parameters of treated water
- Improve Treatment plant aesthetics & Operators Health
